

Splinting Wetting Techniques

Water Bottle Technique

1 Dribble water onto backing material and rub beaded water to penetrate backing material.

Water Bottle/Faucet Technique

1 Pour minimal amount of water down back side of fiberglass using faucet or water bottle to dampen splint.

Opening Splint Cover Technique

1 Peel back one side of backing material to expose splint.

2 Squeeze splint to spread water into fiberglass.

Dipping in Bucket Technique

2 Dribble water onto exposed splinting material.

1 Squeeze one or two times while immersed in water.

3 Rub water to penetrate splint material.

2 Squeeze out excess water.

4 Replace backing material.

3 Wrap flat in towel and press to blot out remaining excess water.
